
The Touch

Bean to Cup Coffee Machine

The Touch has a super sleek look with an inbuilt 7 inch touch screen display. The screen interface is compatible with Android systems and is completely customisable depending on the user's requirements.

The Touch

BENEFITS

- 3 canisters to store coffee beans, powdered milk and chocolate. If using the fresh milk option one of the canisters can be replaced with decaf beans
- The MTT milk pump system dispenses hot and cold milk to just the right foam density
- Step-by-step easy to use pictorial cleaning guide
- Optional steam wand - enables you to make specialty drinks
- Metal brewing unit for true espresso extraction
- Optional milk chiller and cup warmer
- Analytical data available for complete transparency on ingredient usage and cleaning and maintenance undertaken
